

# Virtual education workshops for InsuResilience Investment Fund's prospects

Boost climate insurance knowledge for key stakeholders

Pre-investment and pre-technical assistance service

## Objectives of education workshop

The two main objectives of the education workshop are improving understanding of climate insurance and enabling communication between key stakeholders.

It is a free of charge service that is usually deployed before the investment happens.

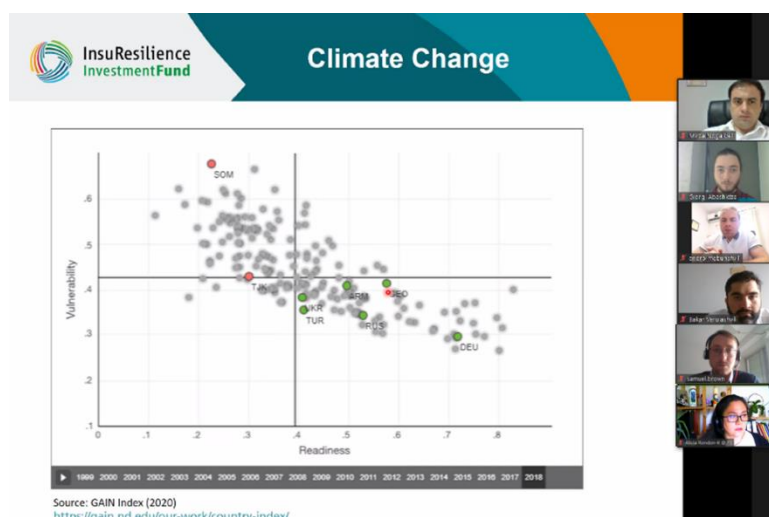

During the workshop, the company's key decisions makers and staff, insurance regulator, ministry of agriculture and/or international donors come together to boost climate insurance knowledge.

Workshop participants get an overview of climate insurance products and discuss what this means for your specific company in terms of business development, financial performance and challenges.

Additional topics are as affordability, basis risk, capacity building, data procurement, reinsurance access, government support and monitoring.

## Your added value

- + Available as pre-investment and pre-TA service
- + Tailor-made virtual workshop conducted by experienced international trainers on zoom. Multiple interactive sessions are scheduled over three days.
- + Brings key stakeholders together to create momentum for climate insurance
- + You understand climate insurance and you can establish a business case as you see opportunities, challenges, and barriers
- + Combination of theory and practical examples with interactive group work and case studies
- + Perfect basis to boost and accelerate IIF investment and TA services

Various key stakeholders attend the virtual education workshop to discuss opportunities and challenges of climate insurance.

## How it works

Experienced international consultants conduct an interactive virtual climate insurance workshop. Within less than a month a tailor-made curriculum

is ready so you can discuss how to introduce or scale up climate insurance. The education workshop can accelerate IIF investment and Technical Assistance services.

### CLIMATE INSURANCE FOR YOU

Introduction of your company, your customers, your market and country-specific environment  
Discuss your opportunities and challenges  
Key steps in product development, institutional set-up, market research, distribution, impact and scale up potential  
Can be tailored to your needs, and specific deep dives can be added

### TECHNICAL ASSISTANCE BY IIF

Introduction of Technical Assistance and its services and future collaboration with TA facility

### OVERVIEW OF CLIMATE INSURANCE

Understand key insurance concepts and technical features  
Get to know existing schemes around the globe

## InsuResilience Investment Fund (IIF)

The InsuResilience Investment Fund (IIF) protects poor and vulnerable people in developing countries through climate insurance solutions against extreme weather events and natural catastrophes.

IIF provides financing to qualified companies active in the insurance value chain. Additionally, IIF provides technical assistance to set up and distribute insurance solutions.
